<b>SUGGESTIONS FOR SENDING SAMPLES:</b>		
<p><b>For Sending Serum Samples ONLY (For Thyroid testing, Titers and Heartworm testing).</b> You can use USPS priority 2-day. Put the serum tubes in a zip lock baggie &amp; then wrap with bubble wrap or padded paper and put in a small sturdy box with the filled out Test Request Form. NO ICE PACK IS REQUIRED. Serum samples are viable for about 14 days at room temp (except for during extreme hot weather conditions)</p> <p><b>Whole Blood Samples – Lavender Top Tubes</b> Whole Blood Samples (lavender top tubes) REQUIRE an ice pack and should be sent by overnight courier (FedEx or UPS), or can be sent USPS Priority Mail (2-day) with an ice pack. This would include any tests or profiles that contain CBC testing, which requires a lavender top tube.</p>
